2. If there is a real demand for a stall near the Museum and if a monthly rent of Rs.25/- can be guaranteed, a pucca building costing about Rs.6,000 can be built in a suitable place instead of a wooden booth, as proposed, which may not entirely satisfy the purpose and which is likely to deteriorate very soon. Enough space for such a building will have to be handed over to the P.W. Department by the Gardens Department.

9 It is not desirable nor worthwhile to put up a costly building near the museum as a replacement booth. The wooden booth would be all right and being a removable one, it could be easily transferred to some other place when it is necessary to keep the museum premises clear. If a booth is put up at Govt. cost, the rent should be raised to an extent Rs 10 or Rs 15 p.m. so that the cost thereof may be realized in ^{6 or 7} years.

Sir

I have the honour to submit herewith, in original the plan and estimate with report amounting to Rs 800/- received from the Executive Engineer Buildings Division, Bangalore, for the construction of the above building near the Government Museum and to request that necessary instructions may kindly be issued to the Public Works Department to construct the building from their funds, as we have no funds to meet the charges in this Departmental Budget.

A sum of Rs 5/- is being levied by this Department as ground rent for selling fruits etc in a temporary booth put up by the vendor. The rent has to be remitted after putting up a decent booth.

report to accompany the estimate for constructing a Booth in front
of Government Museum, Bangalore for selling fruits etc

Ref:- Instructions of Dewan during Inspection.

At present an ugly structure is put up in front of Museum by the fruit seller who is permitted to sell fruits and tea at the place for a monthly ground rent of Rs.5/- which is recovered by the Garden Department. The structure put up is an unsightly appearance to the road. During one of his inspections the Dewan has instructed that it may be investigated if it would not be worth while putting up a decent booth at some expense out of the Revenue being realised. A plan for a booth was got and shown to the Dewan and the Government Architect. The present plan is drawn on the lines of suggestions given. A wooden booth is proposed. The roof is of Trafford sheets. It is a portable booth of removal and refixing from one place to another. The cost of booth is Rs.800/- The total ~~annual~~ annual rent realised is 5x12 or Rs.60/- Even if Rs.24/- at 3% is set apart on interest the balance of Rs.36/- is available towards capital realisation. The whole sum of Rs.800/- can be realised in 22 years.

Early sanction to the estimate may be accorded.
